# Intensive care for biomedical information. Dialog.

Dialog has now added the Medline database (available world-wide), and that makes us the world's most comprehensive single source of medical, life science and biomedical reference information.

In that vital database group, Medline joins Excerpta Medica, Biosis, International Pharmaceutical Abstracts, Life Sciences Collection, and SciSearch. That's a total of more than 10 million medical, pharmaceutical, and biochemical references.

As the world's largest online information retrieval system, Dialog currently has more than 130 databases and 50 million references and abstracts. But the benefits of

biomedical searching in Dialog don't end there. For example, our *online* coverage of Medline goes all the way back through 1966. And we offer a variety of contract options to suit any budget.

With our unbeatable collection of databases, excellent training programs and superb documentation, Dialog is clearly the best choice for modern reference searching, particularly in the biomedical field.

Get complete information from Dialog Information Services, Dept. 70, 3460 Hillview Ave., Palo Alto, CA 94304. Call toll-free (800) 227-1927. In California, call (800) 982-5838.

# Easy Access to Vital Information

OCLC provides quick access to the vital information your organization depends on. You can access our Online Library Systems quickly, easily, and inexpensively. Each day, over 3,000 member libraries rely on us to meet their automation needs.

## **Two Important Access Options**

You can access these systems through OCLC model terminals or dial access terminals. (Most ASCII terminals with telecommunications capability can be used.) Our brochure "OCLC and Dial Access," available through your network office or OCLC, gives the specific requirements for both teleprinters and CRT terminals.

## **The Resource-sharing Advantage**

Regardless of access method, you're sharing with over 3,000 libraries through acquisitions, cataloging, interlibrary loan, serials control, and union list services. The Online Union Catalog, with over 9 million bibliographic records (including CATLINE), is the heart of this resource-sharing advantage.

To learn more about our Online Library Systems and our developing local systems, visit our booths, 54-55, in the exhibit area or contact your network office directly.

**At last!**

## **One language to search DIALOG, BRS, SDC, ISI and MEDLINE!**

**W**ith the Sci-Mate™ Universal Online Searcher and a microcomputer, you can use *one* language to search the systems you use most. *There's no training needed:* you'll learn as you use Sci-Mate because its menu-driven commands are in plain English. And this menu-driven system offers the search capabilities of the host system (for example, EXPAND, SEARCH, and current awareness functions).

If you prefer, you can search in the original language of the host system. Either way—menu-driven or host system—*Sci-Mate saves you time by automatically dialing up and logging on for you.*

You and your staff can search more quickly and easily with the Sci-Mate Universal Online Searcher. And it costs just \$440.

There's also additional software that lets you incorporate the items you retrieve online into your own Sci-Mate data management system. Place your hits in your own "work file" to edit, sort, or flag them for ordering . . . create your own data base that's free-text searchable. Sci-Mate's Personal Data Manager costs \$540.

Purchase both at one time and pay \$880—a \$100 savings.

Find out how Sci-Mate can speed and simplify your online searching—call 800-523-4092, or mail the coupon provided here.

(Sci-Mate is available for IBM PC, Vector 3 or 4, Apple II, TRS 80 Model II, and CP/M-80 systems with standard 8" disks.)

**We look forward to seeing  
you at Booths #60 and 61**

# The Handbook of Nonprescription Drugs 7th Edition

## The classic reference on nonprescription drugs

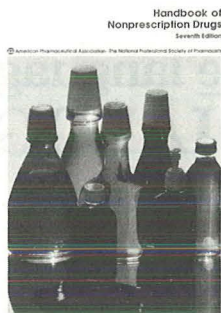

The *Handbook of Nonprescription Drugs* has proven to be a valuable addition to the reference section of medical libraries for 15 years.

The book features authoritative, up-to-date discussions on nonprescription drugs in 34 chapters. Widely used as a textbook and as a desk reference for practicing pharmacists, the *Handbook* is also a popular reference for other health care professionals including physicians and nurses.

The newest edition of this classic has recently been published by the American Pharmaceutical Association after three years of preparation. This 7th Edition has 722 pages (including a 24-page index), is 8½ x 11 inches with a colorful dust jacket, and features a special 8-page section of full-color clinical photographs.

Also included are more than 100 pages of product tables showing ingredient information.

The price is only \$45 per book, including shipping. **Use the order form below to order copies for your library.**

The *Handbook* is **the most authoritative available guide to nonprescription drugs. It is published by the American Pharmaceutical Association**, the national professional society of pharmacists, with more than 50,000 members worldwide.

the many ways it can help you!

**is ready to meet  
your information  
management needs!**

With **STAR™** you can enter, store, and update textual information in **local** online databases, on a low-cost, highly reliable microcomputer, and you can use the system to search and retrieve that same information **immediately**.

Since **STAR™** will be completely under your own control, you will be able to use it as often and as much as you like, without adding to your costs. With **STAR™** you can:

- ★ Define databases without programmer assistance
- ★ Input data with a high-speed, full-screen text editor, with automatic validation of data as it is entered
- ★ Search the information in the database as soon as it has been entered, with no overnight delays

★ Search the databases, using features you'd expect to find only in the big commercial systems — Boolean operators, truncation, nested parentheses, field-qualification, index viewing, etc.

★ Produce output for reports, catalogs, photocomposed publications, or online distribution

★ Maintain complete control over the security of your data

There is no limit to the type of environment in which **STAR™** can be used. It can help you to store, index, and access all types of textual records.

For more information about how **STAR™** can meet your needs, call us at (213) 829-9972 or return the coupon below.

**MEDICAL CASEBOOK OF  
DOCTOR ARTHUR CONAN DOYLE:**

**From Practitioner to Sherlock Holmes and Beyond**

by Alvin E. Rodin, M.D., M. Sc, and Jack D. Key, M.A., M.S.

In addition to recognition in literature, Sir Arthur Conan Doyle should be recognized for his work as a physician and for his medical concepts expressed in various publications.

He was a man for all seasons — a diversified genius — and deserves to have the full story established. This book documents the medical facets that were inextricably entwined in the exploits of Sherlock Holmes and Dr. John Watson.

  - parade
  - shootout (look out!)
  - outrageous cow-chip throwing contest (you are invited to test your skill)
  - professional riding exhibition by the Harris County Sheriff's mounted posse

Transportation is provided to and from the rodeo.

## BIOSIS TEST #2:

# WHAT'S YOUR S.Q.\*?

Take this test if you're serious about getting the most out of your biological and biomedical literature searches.

### QUESTION

1. Where can you find a subject index (listing more than 5000 subjects) to BIOSIS Concept Codes?
  - ☐ The BIOSIS Information System— a Self-Teaching Outline
  - ☐ How to Search Biological Abstracts and Biological Abstracts/RRM (Reports, Reviews, Meetings) by Computer
  - ☐ The 1983 BIOSIS Search Guide
2. What publication serves as both a guide to the vocabulary of the BIOSIS Previews file and a practical text for use in developing effective search strategies?
  - ☐ BioSearch
  - ☐ The 1983 BIOSIS Search Guide
  - ☐ The BIOSIS Information System— a Self-Teaching Outline
3. How can you raise your BIOSIS Previews S.Q.?
  - ☐ Attend and/or sponsor a free BIOSIS training course in your area.
  - ☐ Subscribe to the 1983 BIOSIS Search Guide.
  - ☐ Request a complimentary copy of the brochure, **How to Search Biological Abstracts and Biological Abstracts/RRM (Reports, Reviews, Meetings) by Computer.**
  - ☐ All of the above.

### ANSWER

1. In the 1983 **BIOSIS Search Guide**, *The Concept Code Subject Guide*, a new feature of the 1983 **BIOSIS Search Guide**, helps identify the BIOSIS Concept Codes relevant to various biological and biomedical topics.
2. The **BIOSIS Search Guide** is the comprehensive reference tool designed to support users of BIOSIS' machine-readable data in any online or offline search system.
3. All of the above. Each of these activities will help make your online searches more productive, less costly, and less time-consuming.

The single most valuable reference tool for users of BIOSIS Previews, however, is the new 1983 **BIOSIS Search Guide**. Containing over 600 pages of descriptive information, indexing glossaries, and search strategy tips, the **BIOSIS Search Guide** is indispensable for maximizing information retrieval on your specific research topic.

For more information about any of the publications listed above, or to place an order, contact BIOSIS User Services, 2100 Arch Street, Philadelphia, PA 19103-1399, U.S.A. or the BIOSIS Official Representative in your area. To speed your order, call (215) 587-4800 or toll free (800) 523-4806 (outside PA).

# The Microform Remedy

## Particularly Beneficial for the Medical Library

University  
Microfilms  
International

300 North Zeeb Road, Ann Arbor, Michigan 48106

**AILMENT:** Too much vital periodical and reference material crammed into too little space.

**TREATMENT:** The Microform Remedy (on fiche or film) including

- 108 of the 135 titles in the Brandon Bibliography
- 109 of the 120 titles in the Abridged Index Medicus
- 39 of the 47 titles in the Brandon List of Nursing Journals
- The History of Nursing Collection on Microform

**BENEFITS:** Save up to 96% of the space needed for bound volumes. Eliminate such persistent maladies as torn and mutilated pages, missing issues, inaccessibility while materials are at binderies.

**COST:** Generally less than the cost of binding those same materials.

For a preliminary diagnosis and a complete list of the above titles, contact University Microfilms International (UMI).

Call UMI TOLL-FREE 1-800-521-3044. From Alaska, Hawaii, or Michigan, call collect 1-313-761-4700. From Canada, call TOLL-FREE 1-800-268-6090 and ask for UMI.
