**DEMYSTIFYING THE DRAGON: STRATEGIES FOR 2000 PLUS**

Freida O. Weise, AHIP,  
president, MLA

**From the President of MLA**

Bienvenue! Welcome! I am delighted to welcome you to MLA/CHLA/ABSC 2000, our Year 2000 annual meeting as well as the first joint meeting of the Medical Library Association (MLA) and the Canadian Health Libraries Association/Association des bibliothèques de la santé du Canada (CHLA/ABSC). What better place than the glorious city of Vancouver to begin the second century of MLA!

Thanks go to the 2000 National Program Committee for planning such a rich and diverse program befitting our unique joint conference. The program is bound to offer something for every attendee. Not only can you learn to "Demystify the Dragon," you can also devise your own strategies for coping with 2000 and beyond. But don't give in to all work and no play—enjoy networking with your colleagues at social events, enjoy the spectacular scenery of Canada, and enjoy the diversity of cultures from North, South, East, and West.

I look forward to an exceptional week ahead as we all seek to uncover that pesky dragon and find what symbolizes life, growth, riches, virtue, and harmony for all of us.

Frieda O. Weise, AHIP, president, MLA

Liz Bayley, president,  
CHLA/ABSC

**From the President of CHLA/ABSC**

It is my great pleasure to welcome my fellow members of the Canadian Health Libraries Association/Association des bibliothèques de la santé du Canada (CHLA/ABSC) and of the Medical Library Association (MLA) to beautiful Vancouver. This is the first joint conference of our two associations, making it a truly pan-North American event. I look forward to the opportunity to meet my colleagues, to share and generate ideas, and to build on the strengths of two dynamic health sciences library associations.

I would like to thank Brett Kirkpatrick, the National Program Committee, and the Local Assistance Committee for all of their hard work in organizing this enticing conference, which has brought us all together. A special thanks goes to the CHLA/ABSC secretariat, to the publicity team headed by Tim Ruggles, and to translator par excellence Pierre Fournier for their good humour and patience.

So join me as East meets West and North meets South for an exciting week of "Demystifying the Dragon" and girding ourselves to meet the challenges of the twenty-first century.

Liz Bayley, president, CHLA/ABSC

**Welcome to Vancouver**

Welcome to Vancouver and to MLA/CHLA/ABSC 2000, where we will explore and demystify strategies for embracing the personal and professional opportunities that are shaping our futures. The National Program and Local Assistance Committees have combined the expertise and creativity of medical librarians from two nations to design a truly international program for this historic joint meeting of the Medical Library Association (MLA) and the Canadian Health Libraries Association/Association des bibliothèques de la santé du Canada (CHLA/ABSC). The boards of the two organizations, section and special interest group program planners, staff of MLA and its meeting planners, various individuals with specialized expertise, and numerous librarians from British Columbia and the Pacific Northwest have provided additional and enthusiastic support.

MLA/CHLA/ABSC 2000 features outstanding plenary sessions by nationally known experts, contributed and invited papers and posters organized by members, two substantive symposia on topics of immediate interest, and more than thirty continuing education courses. Time also has been set aside for special meetings and presentations, for visits to exhibits, and for social opportunities to share ideas and practices with colleagues. Take time as well to enjoy our host city and discover why it takes special and deserved pride in its rich diversity of human and natural resources.

We sincerely hope that the Golden Dragon of the Chinese lunar calendar will bless your professional development and enrichment activities at MLA/CHLA/ABSC 2000 for the Year 2000.

**DÉMYTHIFIER LE DRAGON: STRATÉGIES POUR L'AN 2000 ET AU-DELÀ**

Freida O. Weise, AHIP,  
présidente de la MLA

**Mot de la présidente de la MLA**

Bienvenue! Welcome! Je suis heureuse de vous souhaiter la bienvenue au Congrès 2000 de la MLA/ABSC/CHLA. C'est également notre assemblée générale annuelle de l'an 2000 de même que la première réunion conjointe de la Medical Library Association (MLA) et de l'Association des bibliothèques de la santé du Canada/Canadian Health Libraries Association (ABSC/CHLA). Il n'y a pas de meilleur endroit que la remarquable ville de Vancouver pour amorcer le deuxième siècle de la MLA!

Nos plus sincères remerciements vont aux membres du Comité 2000 du programme national pour avoir planifié un programme riche et diversifié qui convient très bien à notre congrès conjoint. Chaque participant et participante trouvera son compte dans le programme. Non seulement vous pourrez apprendre à «démystifier le dragon», mais vous pourrez également concevoir vos propres stratégies pour vous adapter à l'an 2000 et au-delà. Mais ne pensez pas qu'à travailler sans vous amuser! Faites du réseautage avec vos collègues de travail lors d'activités sociales, découvrez les paysages spectaculaires du Canada, lancez-vous à la découverte de la diversité des cultures du Nord, du Sud, de l'Est et de l'Ouest.

J'ai bien hâte de vivre cette semaine exceptionnelle de même que de découvrir toutes les facettes de ce sacré dragon et de connaître ce que symbolisent pour chacun de nous la vie, la croissance, la richesse, la vertu et l'harmonie.

Frieda O. Weise, AHIP, présidente de la MLA

Liz Bayley, présidente de  
l'ABSC/CHLA

**Mot de la présidente de l'ABSC/CHLA**

C'est avec grand plaisir que je souhaite la bienvenue à mes collègues membres de l'Association des bibliothèques de la santé du Canada/Canadian Health Libraries Association (ABSC/CHLA) et de la Medical Library Association (MLA) dans cette ville magnifique qu'est Vancouver. Il s'agit du premier congrès conjoint de nos deux associations et d'un événement réellement pan nord-américain. J'ai bien hâte de rencontrer mes collègues pour partager et générer des idées qui nous permettront de construire sur les forces de nos deux dynamiques associations des bibliothèques des sciences de la santé.

J'aimerais remercier Brett Kirkpatrick, du Comité du programme national, de même que les membres du Comité d'aide local pour le travail remarquable qu'ils ont accompli dans l'organisation de ce congrès des plus intéressants et qui nous permet de tous nous réunir. J'aimerais remercier tout particulièrement le Secrétaire de l'ABSC/CHLA, l'équipe de publicité dirigée par Tim Ruggles et notre excellent traducteur, Pierre Fournier, pour leur humour et leur patience.

Accompagnez-moi dans ces rencontres entre l'Est et l'Ouest et entre le Nord et le Sud pour une semaine des plus intéressantes de «démystification du dragon» où nous nous préparons à relever les défis du 21e siècle.

Liz Bayley, présidente de l'ABSC/CHLA

**Bienvenue à Vancouver**

Bienvenue à Vancouver et au Congrès 2000 de la MLA/ABSC/CHLA où nous explorerons et démythifierons les stratégies en vue de profiter des ouvertures personnelles et professionnelles et ainsi façonner un avenir meilleur pour nous tous et toutes. Le Comité du programme national et le Comité d'aide locale ont combiné l'expertise et la créativité des bibliothécaires de la santé de nos deux pays et ont élaboré un programme véritablement international pour cette réunion conjointe historique de la Medical Library Association (MLA) et de l'Association des bibliothèques de la santé du Canada/Canadian Health Libraries Association (ABSC/CHLA). La direction de ces deux organismes, les planificateurs des programmes à l'intention des sections et des groupes d'intérêt spéciaux, le personnel de la MLA et ses planificateurs de réunion, les divers experts et expertes et les nombreux bibliothécaires de la Colombie-Britannique et du Nord-Ouest du Pacifique nous ont accordé leur soutien enthousiaste.

Parmi les activités du Congrès 2000 de la MLA/ABSC/CHLA, on compte des séances plénières remarquables données par des experts de renommée nationale, des communications et des séances d'affiches qui sont organisées par les membres, deux symposiums importants sur des sujets d'actualité et plus de trente cours de formation professionnelle. On a également réservé du temps à des rencontres et des présentations spéciales, à des visites d'expositions et à des rencontres sociales pour échanges d'idées et de pratiques avec des collègues. De même, prenez le temps de découvrir notre ville hôte, de comprendre pourquoi elle est si spéciale et pourquoi elle fait la fierté de sa population tant par sa diversité humaine que par ses richesses naturelles.

Nous espérons sincèrement que le dragon d'or du calendrier lunaire chinois sera bénéfique à votre formation professionnelle et à vos activités de perfectionnement lors du Congrès 2000 de la MLA/ABSC/CHLA.

### HANDBOOK OF OXIDANTS AND ANTIOXIDANTS IN EXERCISE

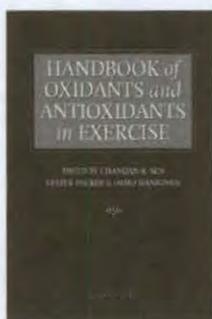

Edited by C. Sen, L. Packer and O. Hänninen

*The Handbook of Oxidants and Antioxidants in Exercise* examines the different aspects of exercise-induced oxidative stress, its management, and how reactive oxygen may affect the functional capacity of various vital organs and tissues. It includes key related issues such as analytical methods, environmental factors, nutrition, aging, organ function and several pathophysiological processes.

This timely publication will be of relevance to those in biomedical science and is designed to be readily understood by the general scientific audience.

### SYNTHETIC PEPTIDES AS ANTIGENS

By M.V.H. Van Regenmortel and S. Muller

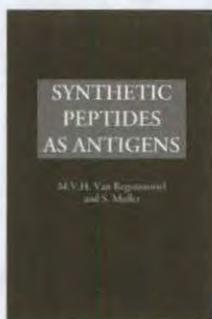

This newest edition to the *Laboratory Techniques Series* gives current state of the art use of synthetic peptides in molecular biology and practical protocols on how to conjugate peptides, immunize animals with peptides and monitor immune responses to peptides in vitro. This volume also describes typical use of anti-peptide antibodies in molecular and cellular biology as well as the use of peptides in the diagnosis of viral infections and autoimmune diseases, and the use of peptides as potential synthetic vaccines. ### OCCUPATIONAL HEALTH FOR HEALTH CARE WORKERS: A PRACTICAL GUIDE

Edited by H.-M. Hasselhorn, A. Toomingas and M. Lagerström

Occupational risks to health care workers are extremely diverse and new hazards often arise as a result of rapidly changing working conditions. This book covers occupational risks to health care and dental staff in contact with patients, and to those in supporting roles, such as laboratory personnel. Its 46 chapters deal with a wide range of biological, chemical, physical and psychosocial hazards. Each chapter provides an up-to-date overview of risk assessment and describes pathways in problem solving and risk management.

Written for occupational health practitioners such as occupational physicians, nurses, and safety engineers, it may also be useful to health and safety advisors, health care administrators, managers and to medical students.

### SAFETY IN MEDICINE

Edited by C. Vincent and B. De Mol

Studies in the US suggest that about 4% of hospital patients are unintentionally harmed by treatment. This book considers the benefits medicine may gain by adopting approaches to safety used in other areas. The role of new technologies, both as hazards and in improving safety, is an essential new challenge addressed by this very topical book.

For clinicians and others involved in healthcare who wish to learn more about approaches to safety and for safety professionals who wish to learn about work in the medical area.

**Topic 1: Best Practices Through Benchmarking.** Two members of MLA's Board of Directors—Bernie Todd Smith, AHIP, director of libraries, ViaHealth, Werner Health Sciences Library, Rochester General Hospital, Rochester, NY; and Jacqueline Donaldson Doyle, AHIP, director, Learning Resources and Continuing Medical Education, Banner Health Arizona, Phoenix—will offer a brief presentation of Phase I: Hospital Library Benchmarking Data. The phases of the project, the project status, and the reasons why librarians need to participate in the project will be discussed. The MLA Benchmarking Initiative was started to help define, develop, and evaluate a coordinated and comprehensive Web-based medical library benchmarking tool that will enable members to establish best practices, compare important operations, and define appropriate statistics for negotiating with administrators. The MLA Benchmarking Task Force Steering Committee members will answer questions in a fifteen-minute session following the presentation.

An informal meeting entitled, "MLA Benchmarking Initiative: One More Opportunity for Questions and Answers," will take place Tuesday, May 9, from 4:00 P.M.–6:00 P.M., VCEC, Room 12.

**Topic 2: better\_health@here.now.** The Washington, DC-based Association of American Medical Colleges' (AAMC) better\_health@here.now project was initiated to explore the ways that medical schools and teaching hospitals can best use information technology—in biomedical research, education, and health care—to improve the health of people and communities. Project Director Valerie Florance, Ph.D., AHIP, AAMC, Washington, DC, will seek additional input for and share findings from the recent Delphi studies. Time is set aside for audience questions and suggestions.

VCEC, Exhibition Hall A

**Session I, The John P. McGovern Lecture: "Digital Doctoring: Health Online and the Empowered Medical Consumer"**

Heralded as an "online health hero," Tom Ferguson, M.D., is adjunct professor of health informatics at the University of Texas Health Sciences Center—Houston. He founded the journal *Medical Self-Care* and served for many years as a medical reviewer for the *Whole Earth Catalog*. A recipient of the National Educational Press Association's Distinguished Achievement Award, he organized the world's first conference (in 1993) devoted to consumer-oriented computer resources in health care.

**The Janet Doe Lecture**

Judith Messerle, AHIP, Countway Library of Medicine, Harvard Medical School, Boston, is the 2000 Janet Doe Lecturer. Messerle served as the 1986/87 president of MLA and has been an active member for more than twenty years. Chosen by MLA for her unique perspective on the history and philosophy of medical librarianship, Messerle's lecture, "The Road Not Taken," will also be published in the January 2001 issue of the *Bulletin of the Medical Library Association*.

**Session II, "The Ecological Millennium: Setting the Bottom Line"**

Born in Vancouver and a local celebrity, David Suzuki, Ph.D., interrupted a distinguished career as a geneticist to become an award-winning broadcaster and environmental scientist. He hosts *The Nature of Things* and is a full professor at the University of British Columbia in the Sustainable Development Research Institute. Dr. Suzuki will discuss what he sees as our true challenge—the need to find a way to live rich, fulfilling lives without destroying the web of nature that contains and supports all life. He will address the librarian's role in supporting solutions in science and society.

**Session III, "Demystifying Electronic Publishing: Revelations on the Revolution in Publishing"**

Joint speakers Paul H. Ginsparg, Ph.D., and Betsy L. Humphreys, AHIP, will "take on" electronic publishing. Ginsparg, a physicist at Los Alamos National Laboratory, Los Alamos, New Mexico, and Humphreys, associate director for Library Operations and assistant director for Health Services Research Information, U.S. National Library of Medicine, Bethesda, MD, will attempt to answer the question on everyone's mind: What will be the role of the medical librarian in the age of electronic publishing?

**Poster Session/Séance d'affiches***Monday, May 8, 2:00 P.M.—4:00 P.M.*

Hall of Exhibits

Come visit the Poster Session and learn from your colleagues. Both print posters and interactive computer demonstrations will be highlighted. Presenters will staff the session from 2:00 P.M.—4:00 P.M. on Monday to answer your questions and describe their work. Print posters will be left up for display through Tuesday afternoon. All presentations will be held in the Hall of Exhibits.

Print posters will remain up until Tuesday, May 9, 2:00 P.M.

**Welcome Reception and Opening of the Hall of Exhibits/Réception de bienvenue et ouverture de la salle des expositions***Saturday, May 6, 5:45 P.M.—7:45 P.M.*

Hall of Exhibits

Sponsored in part by CISTI—Canada  
Institute for Scientific and Technical  
Information with CHLA/ABSC.

Join us for one of MLA/CHLA/ABSC 2000's biggest parties—"The Dragon Demystified," the welcome reception and official opening of the Hall of Exhibits. This is the perfect opportunity to meet with friends as you take a festive tour of the exhibits while enjoying great food, drinks, and conversation. You don't want to miss this chance to be reunited with old friends and make new ones.

One ticket to this event comes with Inclusive and Conference-Only registrations. Additional tickets can be purchased for \$35 USD (\$50 CDN) in the Registration Center.

**SUNRISE SEMINARS****Annual Reviews**

VCEC, Room 9

Learn how Annual Reviews Online can save your user's time and your institution's money. Please join us for continental breakfast to discover how Annual Reviews Online synthesizes the vast amount of primary research literature to provide qualified, relevant search results. Literature will be provided to distribute to your institution's users to inform them of the time-saving features and benefits of Annual Reviews Online, including toll-free links to over 170 key biomedical journals, MEDLINE, and ISI's Web of Science. Learn more about our new money-saving site license policies for single-site, multi-site, and consortia, and register to win a PalmPilotV!

**EBSCO Information Services**

VCEC, Room 11

EBSCOmed is committed to providing health information specialists with the comprehensive full-text databases, sophisticated software, and personalized support necessary to easily retrieve and manage health information and foster consumer health education. The EBSCOmed product line offers a wide range of medically related and interdisciplinary information to the medical market. EBSCOmed products also provide users with the latest in search and retrieval software, offering a choice of Boolean, natural language, or MeSH browsing.

**Gold Standard Multimedia, Inc.**

VCEC, Room 13

The Integrated Medical Curriculum (IMC) is the first product ever that links the study of anatomy, physiology, histology, immunology, medical ethics, and pharmacology on one Internet site. Because the products are linked via powerful search and cross-reference features, finding related material is quick and easy. IMC is free at [www.imc.gsm.com](http://www.imc.gsm.com).

**ISI ResearchSoft**

VCEC, Room 12

Join us for a continental breakfast and an overview of the new EndNote 4, the world's most popular bibliographic software program. We will discuss ways in which the library can teach patrons

how to best utilize EndNote. Learn about the new features, EndNote's interactivity with online databases, database management, and bibliography creation. Training materials provided.

**National Library of Medicine (NLM)**

VCEC, Ballroom A

In NLM's annual user's meeting, staff will discuss PubMed enhancements including the expansion of MEDLINE and PubMed coverage; MEDLINEplus and NLM's consumer information initiative; and new programs including Web-based training, the NLM gateway, the clinical trials database, and PubMed Central.

**OCLC**

VCEC, Room 17

Join us for breakfast. Learn about OCLC/WLN's new Interactive Collection Analysis System (iCAS). OCLC/WLN has added the NLM conspectus to its already popular suite of collection assessment tools. The NLM conspectus is available for medical and hospital libraries of all types. Discussion will focus on the benefits of the conspectus methodology and the features of the iCAS applications.

**Ovid Technologies, Inc.**

VCEC, Room 1

The NewContent@Ovid session will focus on exciting new medical decision-support tools, evidence-based medicine resources, full-text journals and text references, and databases that have been added to the Ovid system since last year. Early risers who attend will be treated to breakfast and demonstrations of the new products, using the new version 4.1.0 of Ovid's Web search and retrieval software, and the On Call interface for end-user clinicians.

**SilverPlatter Information**

VCEC, Room 2

Start the day off right—make it a magical morning with SilverPlatter! Join us for breakfast and find out how you can expand your library's current collection to include vital databases from our Pharmaceutical & Biotechnology Collection, our Medical Collection for Hospitals, and our Academic Medical Collection. See live demonstrations of essential SilverPlatter databases, including EMBASE: Evidence-Based Medicine, and get searching tips on extracting critical evidence-based medicine data from MEDLINE! Free collection building tote bag to each seminar attendee!

**Swets Blackwell**

VCEC, Room 8

Join Swets Blackwell for breakfast and a presentation on ePOCH, Swets Blackwell's Web-based e-procurement solution. Learn how ePOCH speeds the acquisition process for journal subscriptions by enabling end users to place orders without library or purchasing department intervention, and reduces administrative costs while retaining administrative controls.

**SUNRISE SEMINARS****Current Drugs Ltd.**

VCEC, Room 2

Brian Clark will present the new Investigational Drugs database (IDdb<sup>®</sup>) from Current Drugs. Those attending this presentation will be taken through the new front-end design, improved functionality, and additional content now available. Also, there will be a demonstration of how companies can tailor the database to their own needs by having it as part of their intranet, capitalizing on the vast range of linkable databases available in DrugNet, and how users from one company can share resources added specifically for their company.

**EBSCO Information Services**

VCEC, Room 11

EBSCO Online is EBSCO Subscription Services' Web-based solution for electronic journal access and management. Users can go to one URL and use one search engine to search across journal content from a variety of publishers. A range of administrative options allows the service to be customized to meet user needs.

**Gold Standard Multimedia, Inc.**

VCEC, Room 13

Clinical Pharmacology 2000 is a powerful online drug reference that covers all U.S. drugs, including new, investigational, and herbal products. Features include an electronic prescription writer, Spanish patient information, product ID with NDC codes and color photos, drug interactions, adverse reactions, a patient record section, and more. Free via [www.gsm.com](http://www.gsm.com).

**National Library of Medicine (NLM)**

VCEC, Ballroom C

NLM staff will provide an update on the new DOCLINE system.

**Ovid Technologies, Inc.**

VCEC, Room 1

The Technology@Ovid breakfast session will be devoted to important software innovations now implemented or coming soon, including multifile searching, natural language processing, structured searching, and much more. Demonstra-

tions of version 4.1.0 of Ovid's Web search and retrieval software and the Ovid On Call end-user clinician interface will illustrate why Ovid continues to set the pace in the medical information solutions marketplace.

**WELL-CONNECTED From Nidus Information**

VCEC, Room 8

"Untangling the Web: Consumer Health on the Internet" will demonstrate how to build disease-specific patient resources that are both reliable and appropriate. The goal is to lead patrons through layers of relevant clinical information to reach their interest level. Selected Websites will be discussed.

**UpToDate**

VCEC, Room 12

Join us for breakfast. Learn about *UpToDate*<sup>®</sup> and preview the new online version, available soon. Written for medicine subspecialists and internists, this clinical reference library offers instant, current answers to patient care questions. An official educational program of six major medical societies, *UpToDate*'s expert faculty provides a synthesis of the latest scientific evidence and specific recommendations for diagnosis and treatment.

# Q: How can you make your journals more valuable?

Elsevier Science is a leader in developing new products and policies for the digital library – from the ScienceDirect® platform to new approaches in journal pricing and archiving. We have worked closely with and have listened to the concerns of both scientific researchers and librarians.

Here are some of the ways in which we have responded.

## A Commitment to Electronic Archiving

Permanent archiving of electronic information and assured access to those archives are essential in scholarly communication. Elsevier Science is committed to maintaining an active electronic archive of its journals and to providing access to that archive to all subscribers. Elsevier Science is also working with library leaders to identify other archiving strategies that will assure libraries of the permanence of the electronic files, including the identification of independent, distributed repositories acceptable to the library community. We know electronic archiving is important and we have made it a priority.

## A Leader in Electronic Interlibrary Loan

Elsevier Science has been licensing electronic files for network use since 1991. Using these files for interlibrary loan is important to library partners. Elsevier Science was a leader among science publishers in permitting articles from licensed electronic journal holdings to be printed and sent by mail, fax or Ariel to fulfill ILL requests. Libraries can retrieve articles more efficiently and fulfill ILL requests from subscriptions held only in electronic form. Balancing the needs of publishers and libraries regarding shared resources is not simple, but we are committed to advancing the discussion.

## Standards Make Things Work

Elsevier Science has long advocated sharing of research with others in the industry to create standards. We made our detailed SGML document type definition (DTD) freely available. Results of our TULIP experiment were shared openly, as well as the data format standards that resulted from TULIP. We led the development of the unique publisher item identifiers (PIIs) and initiated a project for the creation of a comprehensive scientific font set which, when completed, will be available without charge on the Web. And we have continued to support the development of the digital object identifier (DOI). We know it requires cooperation to make things work.

## Science Delivered to the Desktop

The data is clear: journals are used much more when they are available electronically at the desktop. The Elsevier Science vision is to increase scientists' efficiency by integrating information and delivering it conveniently. That has been part of the notable success of ScienceDirect®, the robust and sophisticated platform built to deliver science "at the speed of the 21st Century." We are working with other information providers to create seamless links. And we have invested in community services such as Ei Village™, BioMedNet™ and ChemWeb, to offer discipline-specific resources. Electronic journals: in context and at your fingertips.

## New Journal Pricing Policy

For more than a decade, libraries have coped with often dramatic price swings. Journal prices increase for many reasons: growth in pages, currency fluctuations, inflation and compensation for cancellations. Beginning with the subscription year 2000, the price for the complete package of Elsevier Science print journals will increase annually less than 10% (in our invoicing currencies). This new policy significantly reduces the effects of currency fluctuations – the main factor causing dramatic journal price increases. Elsevier Science will share the risks and protect library customers by providing greater price stability.

## Authors and Rights

Copyright transfer is widely misunderstood and not all publishers' policies are alike. At Elsevier Science we are sensitive to authors' needs. Scientists publishing in Elsevier Science journals have wide rights to use their works to support their research and teaching. Authors can share their articles with colleagues, post them on campus networks and use them electronically for courses. There is neither a charge to authors nor a need to ask permission for these uses. Our agreement with an author provides both of us with the balance of rights we each need to continue the communication process.

## Find Your Future in the "Green Book"

### Your Comprehensive Guide to Residency Programs

The *Graduate Medical Education Directory*, 2000-2001 Edition, gives medical students the information they need to choose residency programs.

The new edition of the classic "Green Book" is completely updated and expanded with information on more than 7,800 ACGME-accredited programs and 1,600 GME teaching institutions.

The *Directory* contains complete information that's unavailable anywhere else. Along with requirements for 107 specialties and subspecialties, it also provides the names, addresses, and phone and fax numbers of all of the directors of GME programs in the United States. The "Green Book" is the definitive guide to residency programs for students, administrators, researchers, and librarians.

# Liebert online

You've been subscribing to our print journals for years, now you can get them online too!

Our Online Journal Subscription Program is Designed to Provide Maximum Flexibility and Economically Attractive Choices, so that You Can Choose the Option that Works Best for your Library...

**LIEBERT DELUXE** - Ordering this package is like adding a few free journals to your collection...

Regularly priced at \$8,600 (\$9,900 outside USA), when you choose the deluxe package, receive a 25% discount and pay only \$6,400 (\$7,500 outside USA) - a savings of \$2,200 (\$2,400 outside USA). Liebert Deluxe provides you with both print and online subscriptions for all 18 journals. This package covers a whole spectrum of biomedical and biotechnology titles.

Or

**LIEBERT CUSTOM COLLECTION** - Choose any seven journals to meet your library's needs...

Build your own collection, by picking 7 journals from among the 18 we offer, and receive a discounted price of \$4,100 (\$4,800 outside USA). You can select journals by subject matter, i.e. genetics, AIDS, etc. Or pick from different disciplines, so that your collection is well rounded.

Or

**LIEBERT A LA CARTE** - Select only those individual titles and format options relevant to your institution's needs...

With the Mary Ann Liebert A La Carte plan, you never have to subscribe to any publication you don't want or need, nor are you restricted to any one format. You may order print only, online only, or a print/online combination.

Or

# New@Ovid

Ovid is well known for delivering the best implementations of the most important medical and nursing databases, full text journals, and evidence-based resources. Our platform is integrated with millions of links between resources, all under our trusted, feature-rich search and retrieval software.

## **More Resources**

With newly-added resources, we've not only expanded the content and usefulness of our existing bibliographic, full text, and evidence-based offerings, we've also expanded our solutions to include whole new *types* of resources. Text references and clinical decision-support tools add new dimensions to Ovid searching in any medical setting.

## **Enhanced Searching Environment**

New features and searching enhancements bring it all together in ways that make sense, such as multifile searching and customizable automatic de-duping, a new interface which accepts a "plain English" request and ranks the results, and a clinical client specially designed for the point of care.

## **Pre-MEDLINE**

The best MEDLINE is now also the most up-to-date MEDLINE

## **Books@Ovid**

Searchable electronic versions of trusted medical and nursing textbooks and reference texts from multiple publishers

## **Clinical Evidence**

The BMJ Publishing Group's database of clinical questions and related treatments and interventions, designed to help clinicians make the practice of evidence-based medicine part of their everyday practice

## **AMED (Allied and Complementary Medicine Database)**

The British Library's unique bibliographic alternative medicine resource

## **clineguide**

A new resource to support clinicians' day-to-day decision-making, and improve outcomes by delivering patient-specific, actionable answers to clinical questions on drugs and diseases

*When you're looking for authoritative health information,*  
**SEE A SPECIALIST**

If the topic of research is health or medicine, it's imperative that the source is accurate, up-to-date and reliable. That's why the Gale Group is pleased to introduce its new ***Health & Wellness Resource Center***, a specialized resource offering a vast collection of authoritative medical information to academic, medical and public libraries.

No more huge lists of irrelevant search results. No more scouring the Web for relevant sites. No more relying on information from out-of-date or unknown sources. The ***Health & Wellness Resource Center*** — a first among the Gale Group's line of new resource centers — answers the need for a fully integrated, ever-growing electronic resource for all levels of medical and health research.

The ***Health & Wellness Resource Center*** features:

- A broad collection of Gale Group reference titles
- Access to reference and periodical literature, pamphlets, news and other content from a single search
- Access to key health Web search engines for optimal, customized Internet research
- A fully updated, easy-to-use interface
- Add-on modules, including ***Alternative Health Module***

When your users conduct critical research, they need to see the specialist — the ***Health & Wellness Resource Center***. For more information, call 1-800-877-GALE, or visit us on the Web at [www.galegroup.com](http://www.galegroup.com).

*Parliamentary rules are established to aid organizations in the orderly, expeditious, and equitable accomplishment of business. Because order and good will are essential to working together and achieving common goals, it is essential that association members understand parliamentary procedure. The following overview is a guide to participating in business meetings of the Medical Library Association.*

#### PARLIAMENTARY AUTHORITY

Article XIII of the 2000 revised Bylaws of the Medical Library Association provides that rules in the 1990 edition of *Robert's Rules of Order Newly Revised* shall govern the association in all cases where they are applicable and in which they are not inconsistent with the Bylaws of the association.

#### RULES OF THE ASSEMBLY

The following rules govern the conduct of MLA business meetings.

##### The Floor

When addressing the chair, the person desiring recognition moves to a microphone and gives proper identification, including name and institution, as well as city and state or province; only MLA members are permitted to speak on the floor of the assembly.

##### Motions and Resolutions

Main motions (those introducing new business) may be brought to the assembly only if written copies have been distributed at least twenty-four hours before the meeting to each Voting Member present or by unanimous consent of Voting Members present. Resolutions are motions presented formally.

##### Debate

Debate is limited to two minutes for each speaker; no speaker may have the floor twice on the same question until all who wish to speak have spoken. Members speaking a second time are limited to one minute.

##### Quorum

A quorum of 250 Voting Members is required for the transaction of business. For purposes of determining a quorum, a person eligible to cast two votes is counted as two Voting Members.

##### Voting

To facilitate the counting of votes, voting paddles are provided to all eligible voters attending the annual meeting. Voting paddles are color-coded to distinguish between Institutional and Regular Members. General consent may be used as a method of voting if there is no objection. Any of the foregoing rules may be suspended by a two-thirds vote.

#### UNDERSTANDING MOTIONS

Motions are classified according to their purposes and characteristics.

##### Main Motions

An original main motion brings a new substantive question before the assembly for consideration and action. An incidental main motion relates to other business of the assembly or its past or future action. Incidental main motions include motions to amend something previously adopted and to rescind.

##### Subsidiary Motions

These motions may alter the main motion and are related to it.

Lay on the table (a temporary delay)  
Previous question (to stop debate)

Limit or extend debate  
Postpone to a certain time  
Commit or refer to a committee  
Amend  
Postpone indefinitely (to kill)

##### Privileged Motions

These motions have no direct connection to the main motion. They are the highest ranking motions and are designed to take care of emergencies that arise in the assembly.

Fix the time at which to adjourn—set an adjourned meeting  
Adjourn  
Recess  
Question of privilege  
Call for the orders of the day

##### Incidental Motions

These motions arise only incidentally out of business before the assembly. Most of these motions are not debatable and are handled as soon as they arise. Some incidental motions are:

Appeal from the decision of the chair  
Consider seriatim (consideration by paragraph)  
Division of the question  
Parliamentary inquiry  
Point of information  
Point of order  
Suspend the rules  
Withdraw a motion

##### Motions that Bring a Question before the Assembly Again

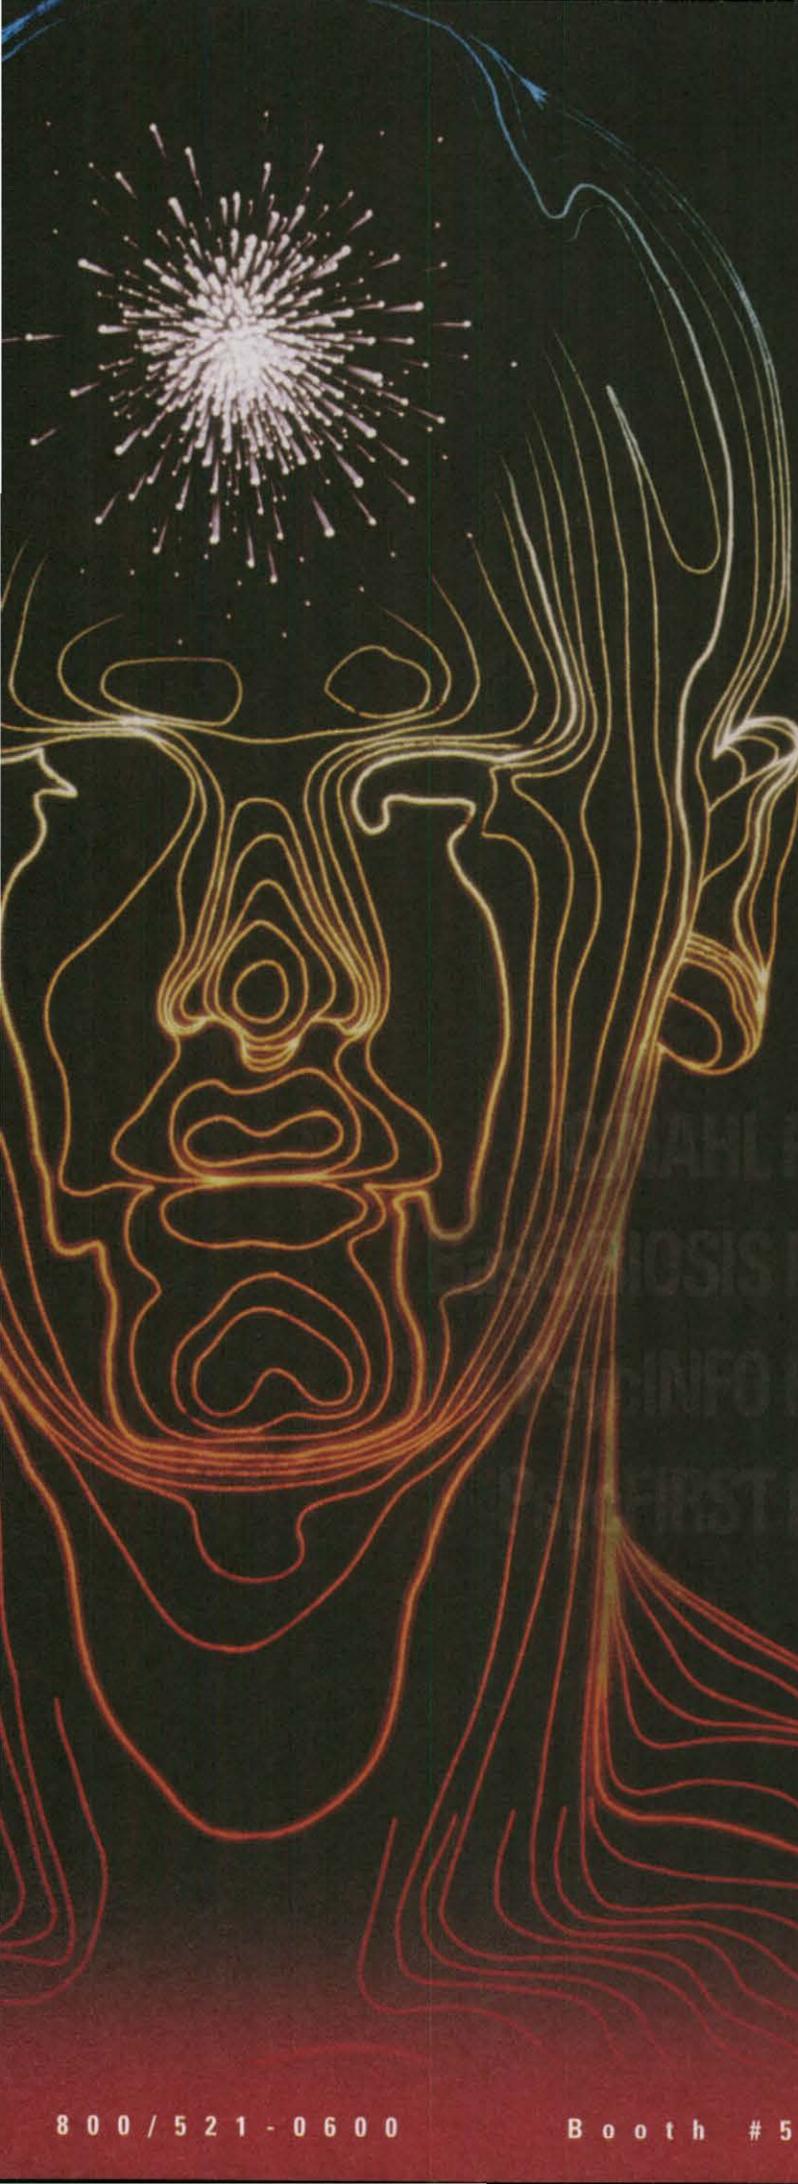

Take from the table  
Reconsider  
Rescind or amend something previously adopted

#### PRECEDENCE OF MOTIONS

Precedence sets the priority of motions and the order in which they must be proposed and considered. Subsidiary and privileged motions are ranked in this descending order:

Fix the time at which to adjourn (highest ranking)  
Adjourn  
Recess  
Question of privilege  
Call for the orders of the day  
Lay on the table  
Previous question  
Limit or extend debate  
Postpone to a certain time  
Commit or refer  
Amend  
Postpone indefinitely  
Main motion

Only those motions that are higher in rank than the pending motion are in order and may be made. For example, when the main motion and the motion to commit are pending, only motions of higher rank than "commit" may be made.

## EMBASE

Rapid access to the world's biomedical and drug literature is critical. With records processed in less than 10 working days, you can rely on EMBASE more than ever before to deliver high-quality content — fast.

This bibliographic database features highly relevant information, much of which simply cannot be found elsewhere. Renowned for its comprehensive international coverage, EMBASE now contains more than 8 million records from 1974 to the present from over 4,000 journals. Over 80% of recent records contain full author abstracts.

### Currency... Content... Accuracy

Search EMBASE or its current awareness companion file, EMBASE Alert, online via traditional dial-up services and the Internet, on CD-ROM, in print and via customised services.

Full text available via the EMDOCS Document Delivery Service.

# LOOK WHAT YOU'RE DOING NOW... WITH OCLC!

**You're providing your users with streamlined access to over 600 electronic medical journals in Electronic Collections Online, available along with ASCII full text, holdings and ILL from the OCLC FirstSearch service.** Stop and see the new FirstSearch that implements MESH in MEDLINE, and links electronic journal articles to MEDLINE and many other databases throughout the service. Electronic Collections Online now offers more than 2,000 journals online through the FirstSearch service.

**You're putting your library at the center of the information universe.** Learn how the OCLC Cooperative Online Resource Catalog (CORC) is helping libraries from around the globe cooperatively select, describe, maintain, and provide guided access to the universe of local and web-based electronic resources. Find out how you can participate at the CORC information session on Monday, May 8, 10 a.m. to noon, room 17.

**You're getting materials to users faster than ever before with the OCLC Cataloging Express service.** OCLC CatExpress provides an easy-to-use, Web-based, copy cataloging solution for small libraries and libraries in groups. By drawing on the richness, diversity and completeness of WorldCat (the OCLC Online Union Catalog), the world's largest online union catalog, you can easily perform routine copy cataloging tasks online.

**You're keeping your cataloging up-to-date with the OCLC TechPro service.** TechPro offers customized cataloging and processing to meet your library's exact specifications. Since 1985, TechPro has been cataloging specialized collections like yours, including those difficult-to-catalog technical reports, conference proceedings, serials and computer files.

*Stop by OCLC booth 901 to see product demonstrations and learn more about OCLC services.*
